DETAILED ACTION

1. Claims 1-39 are presented for examination.
2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/03/2005 has been entered.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rangan et al. (6,802,042) (hereinafter Rangan) in view of A. Hooda et al. (Managing Mobility of Users in a Virtual Network by A.

Hooda, A. Karmouch and S Abu-Hakima; Published by Kluwer Academic Publishers, 1999) (hereinafter Hooda).

5. As per claim 1, Rangan discloses a method of enabling selective access for one or more guests to access to personal information (subscriber's personal information, col 11, lines 43-4-45) of an Internet subscriber on one or more guest web pages (serve web pages, here user is interpreted as guest who is not a subscriber of the portal site, col 11, lines 35-39) of the Internet subscriber (col 11, lines 29-39), said method comprising:

providing the one or more guest web pages (serve web pages, here user is interpreted as guest who is not a subscriber of the portal site, col 11, lines 35-39; col 5, lines 12-15), said web pages being located on the world wide web or an Intranet (portal server set-up at the ISP location, col 11, lines 32-35; col 5, lines 8-16),

receiving a profile of said internet subscriber (storing subscriber information, col 11, lines 33-39) with respect to at least a first of said web pages (subscriber information is used serve web pages, col 11, lines 33-39);

providing on said at least first guest web page (serve web pages, here user is interpreted as guest who is not a subscriber of the portal site, col 11, lines 35-39), based on said subscriber profile (subscriber information is used serve web pages, col 11, lines 33-39), personalized (subscriber information

is used serve web pages, col 11, lines 33-39) combinations of: static information (col 15, lines 45-65), dynamic information (new request and e-mail posted or top ten performing stocks, col 15, lines 1-9; col 17, lines 3-6), locator information (URL, 37, fig 2, col 8, lines 22-23 col 7, and lines 31-38) and communications access for the Internet subscriber (col 7, lines 31-38);

determining an access level of one of the one or more guests (col 6, lines 19-21), and personalizing a web page for said one guest based on a matching an access level of said one guest with said subscriber profile (col 5, lines 36-41; col 7, lines 31-38; col 13, lines 20-30; instructions for specific navigational instructions and login password),

Rangan teaches all the claimed limitation in a web portal environment, the portal provides unique subscription services and stores/creates web pages based on the profile along with any password and or personal codes associated with; subscriber is someone who pays for the goods or services, and guest is a visitor or a person or a user received and entertained without subscribing to the service.

Rangan does not specifically discloses subscriber profile including at least information defining levels of access for each of the one or more guest; said one guest being a different user of the Internet than the Internet subscriber. Hooda discloses personalized information access to the end

user/guest (section 1, Introduction, pages 39-41) location information (section 1.1, Design approach and assumptions, pages 40-41, page 48), static and dynamic information based on users profile (page 48), profile including at least information defining levels (section 1.1, Design approach and assumptions, pages 40-41) of access for each of the one or more guest (pages 40-41, 48, 50-51); said one guest being a different user of the Internet than the Internet subscriber (NPAS subscriber, pages 39—41). It would have been obvious to one of ordinary skill in the art at the time of the invention was made to combine the teachings of Rangan and Hooda. The motivation would have been providing selective access to the personal information to the caller or visitor.

6. As per claim 2, the claim is rejected for the same reasons as claim 1, above. In addition, Rangan discloses determined access level is based on information identifying the one guest, including any of: password, URL, phone number, code, logging in on a guest web page, and biometrics (col 5, lines 37-44 and col 7, lines 31-38).

7. As per claim 3, the claim is rejected for the same reasons as claim 1, above. In addition, Rangan discloses said at least first guest web page comprising personalized combinations includes at least an availability of the guest (col 5, lines 37-44).

8. As per claim 4, the claim is rejected for the same reasons as claim 1, above. In addition, Rangan discloses the current availability of the guest for interactive communication or store and forward communication (col 5, lines 37-44), and media types for contact (col 15, lines 50-51).

9. As per claim 5, the claim is rejected for the same reasons as claim 1, above. In addition, Rangan discloses said store and forward communication comprises one or more of: text, e-mail, voice mail, video mail (col 15, lines 50-51 and col 17, lines 3-6).

10. As per claim 6, the claim is rejected for the same reasons as claim 1, above. In addition, Hooda discloses said interactive communication comprises one or more of: instant messaging (IMS), audio, video, VoIP phone contact, conference call (pages 39-46).

11. As per claim 7, the claim is rejected for the same reasons as claim 1, above. In addition, Hooda discloses said media types include one or more of: HTML or XML interfaced, text, audio, video, conference calls (pages 43-48).

12. As per claim 8, the claim is rejected for the same reasons as claim 1, above. In addition, Rangan discloses said at least first guest web page
